SYMPRO fresh up

NEW Finishing spray for cleaned dental restorations

NEW SYMPRO fresh up

Finishing spray for cleaned dental restorations

SYMPRO fresh up gives professionally cleaned removable dental restorations, such as dentures and splints, a high-quality finish. After cleaning — for example, in the SYMPRO cleaning device — apply the spray with a few sprays and distribute it evenly or wipe it off with a soft, clean cloth. This quickly produces a visibly well-maintained result with a fresh scent — for a pleasant feeling of freshness and a professional, high-quality handoff to the patient.

Benefits

- Noticeable freshness: Added sensory benefit for patients.
- Time-saving application: Ready for immediate use, without the need for additional equipment or materials.
- Stronger service positioning: Visibly enhances the range of services offered, with the potential to differentiate the practice and laboratory.

Details

- High yield: up to 50 applications.

SYMPRO, the compact cleaning system, is particularly well-suited for cleaning removable dental restorations, All-on-X restorations, aligners, and orthodontic appliances.

With its refreshing mint and lemon scents, SYMPRO fresh up gives patients a long-lasting feeling of freshness and well-being.

PREMIUM QUALITY
MADE IN GERMANY
