Occlutec Spray

NEW Occlusion spray

NEW Occlutec Spray

Occlusion spray

With its improved bright colors, Occlutec Spray offers particularly clear and detailed marking of trouble spots in the areas of model casting, crowns and bridges.

Advantages

- Particularly bright colors for optimum surface distinction.
- Optimum dosage thanks to the micro-powdered spray film.
- Homogenous spraying characteristics regardless of fill level of the can.

Details

- Optimized color.
- Spray lasts significantly longer.
- Can be entirely removed with water, leaving no residue.

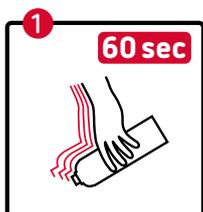

Making work easy

With its improved color formulation, Occlutec Spray is optimized for analog and digital dentistry. It blends our commitment to precision and cleanliness in the dental laboratory with solid quality and cost-effectiveness. And the result is unmistakably Renfert: "making work easy".

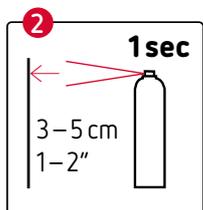

How to achieve the best quality

Application: There are two points to observe in order to take full advantage of the product's performance and high quality:

Shake

Before each use, shake the can thoroughly upside down for 60 seconds. The integrated bead must be clearly audible.

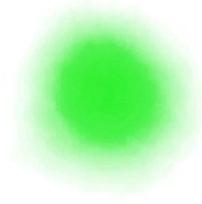

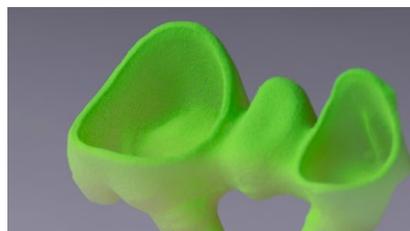

Application

Keep a spray distance of 3-5 cm from the object. Spray on in 1-second bursts in a smooth motion.

NEW: Bright colors!

New formula, new color. The particularly bright colors create optimum surface distinction and make identification of trouble spots easier.

PREMIUM QUALITY
