NEW Base cabinet

Base cabinet for chairside milling machines

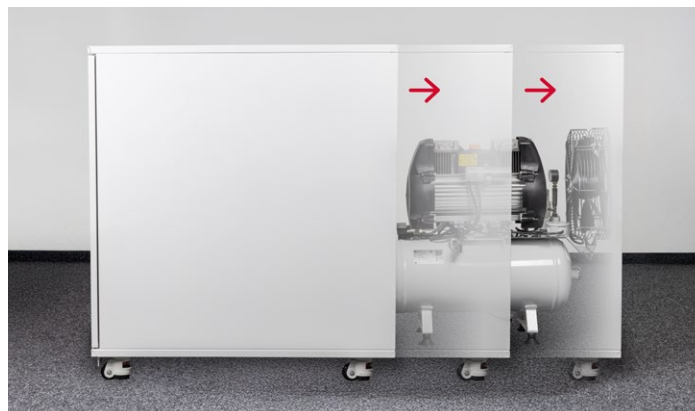

The powder-coated sheet steel base cabinet provides a stable, mobile platform for milling units weighing up to 120 kg (265 lbs), while also enabling the integrated accommodation of Renfert CAM dust collectors, which can be connected directly to the milling unit.

Advantages

- Large storage compartment (on the right) for blanks or accessories.
- Optional space for a compressor providing compressed air to the milling machine.
- Open cabinet rear panels for optimal heat management.
- Lockable and adjustable supports for a secure and level base.
- Castor-mounted feet.

Making work easy

SILENT CAM dust collectors communicate with the milling machines and, during longer manufacturing cycles, shake the filter to optimize airflow.

Free-standing compressors can be easily integrated into the base cabinet by means of an opening in the base plate

Technical data

Dimensions (W x H x D)	850 x 856 x 770 mm
Color	Signal white (RAL 9003)
Weight (without equipment)	70 kg

Ordering information

Base cabinet (Delivery fully assembled)	No. 382000 0000
