

SIMPLEX 2 SX

The new dental 3D filament printer system

Designed specifically for dental offices, laboratories, and orthodontic specialists

Streamline your digital production with precision, efficiency, and long-term reliability. Eliminating the need for post-processing – no cleaning agents or light curing required – it simplifies workflows while delivering exceptional results. With perfectly integrated components, the system supports a wide range of dental applications.

Easy. Intuitive. Efficient.

- ✓ Reduces your team's workload: streamlined processes for an efficient daily routine
- ✓ Simple & efficient: Tested workflows for a wide range of indications
- ✓ Safe & sustainable: no cleaning agents, no harmful emissions
- ✓ Cost-effective: best results with optimized costs and times

Digital temporary restorations

Long and short term temporary restorations in selected VITA shades

Digital impression trays

Functional trays and custom trays

Digital orthodontic models

All model types

One system – achieve your goals quickly, no prior experience needed

Simple operation with user-friendly digital interface

Step by step digital guidance for all processes

Optimal service support

Pre-configured settings designed for a wide range of dental applications

Defined filaments for each selected application
